Hello all,

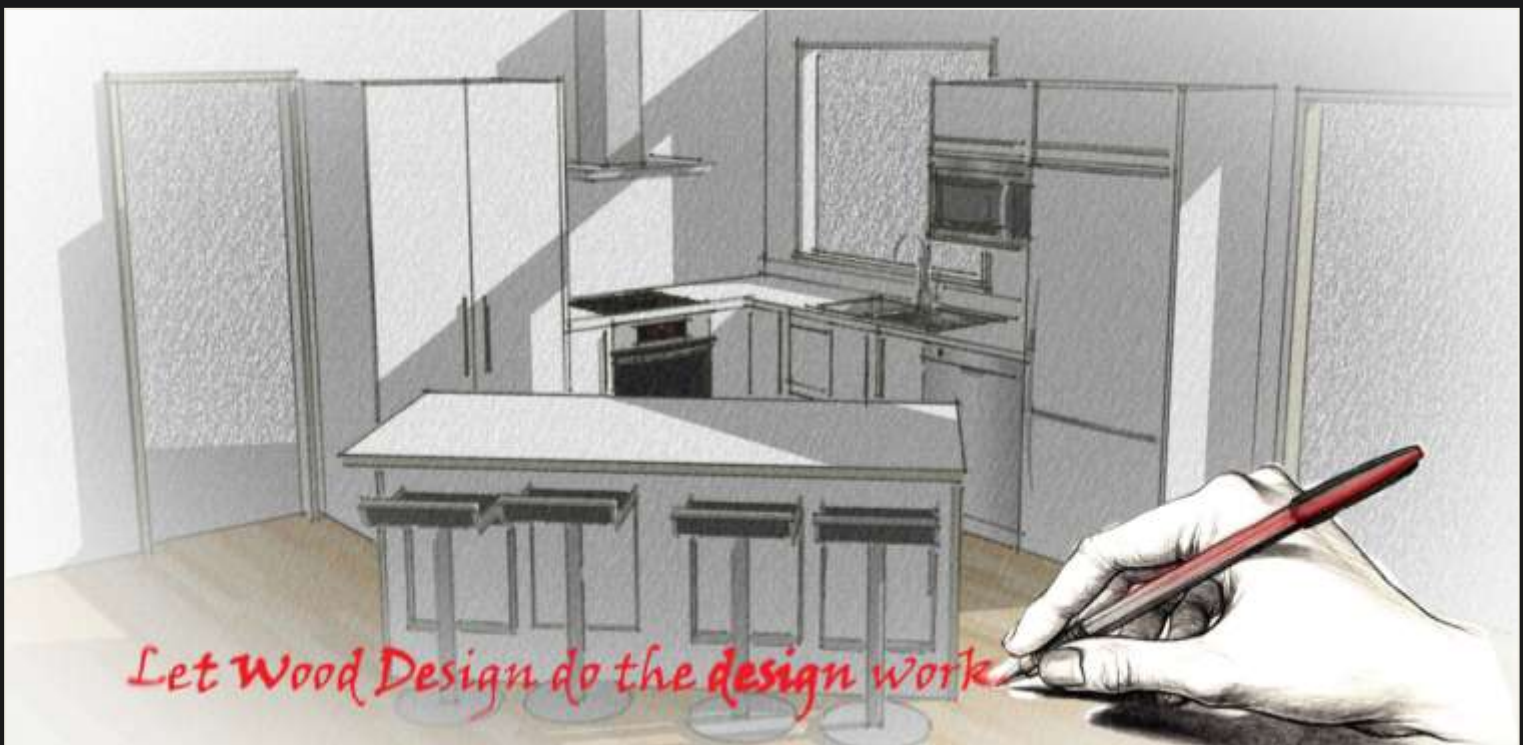

Trust everyone is revived and ready to get back to business!

This year Wood Design intends to push the fact that we can take care of all your cabinetry needs from start to finish- we mean the **DESIGN**, **MANUFACTURE** and **INSTALLTION**. No half measures here!

So for those of you who know what we do, be sure to pass the word on.....

All the best for 2012

Kirsty

3Dimensional drawings to help you invisage....

Now that's pretty **WOW** isn't it!

Wood Design not only can manufacture pretty things, we can design pretty things too.

We can take the hassle right away when it comes to deciding what you want that will look the part yet be practical- I'm sure you'll agree that that can sometimes just be so very hard!

Our 3Dimensional cad drawings help you to visualize what your idea will actually look like, and sometimes it isn't until then that you know what you really want.

The drawings below have been enhanced to turn them from a sketch to a 'photo' look- I say they're 10 out of 10 for realisticness. Not sure about you.

Meet our new employee

Boriana Miladinova

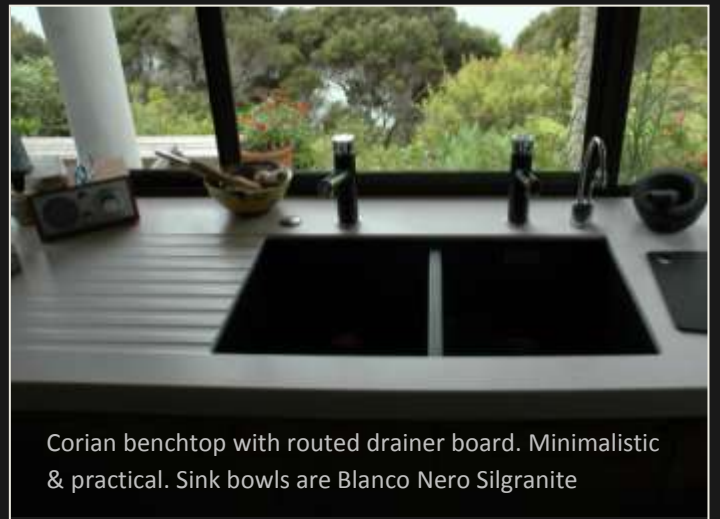

Boriana is an extremely skilled kitchen & Interior designer, with past experience at top end international companies such as SCIC Sofia, Scavolini and Slavin & Co. She comes from Bulgaria and brings us some real European flare.

New Corian® colours available!

Here at Wood Design we are registered fabricators of Corian, therefore can bring you very competitive prices on your corian benchtop.

We really do LOVE corian as much as our clients, so we're excited that they've brought out a beautiful range of new colours to choose from. Not only are they much more *interesting* sheets (eg; some have a marble effect through the sheet) but the colours are specially selected based on current trends... in other words it is simple to find the right colour for the right kitchen.

Corian benchtop with routed drainer board. Minimalistic & practical. Sink bowls are Blanco Nero Silgranite

Tables & benches

Stained Oak tables in Japanese restaurant.

Residential Kitchen

.....in Meltecca & Formica this kitchen was practical and economical. It was simple yet tasteful- adding warmth with the wood grain feature panels.

Meltecca 'Chintz' and 'Jarrah' with Formica 'Castille Granite'

American Oak kitchen with recessed handles

This kitchen was unique, stylish with understated quality. Natural Oak blackened to enhance wood grain.

Entertainment Unit in Sapele veneer

This stunning 3.5m long entertainment unit in Sapele is truly wow. Take note of the frosted glass back with concealed LED illumination from behind. The doors slide to open or shut off the entertainment unit.

Residential Kitchen with Corian benchtop

Corian 'night sky' was used in the kitchen on the island, bar & splashback. Using a very timeless colour scheme that tied in nicely with the polished concrete floor and wooden joinery, this kitchen was a classic stunner.

Teak Handrail

Yes it's simple, but if you've got an eye for quality you'll be sure to appreciate this..... Teak and stainless exterior hand rail.
